Introduction and highlights of the 2025 expo

Traffic Infratech Expo opened its 13th edition which re-affirmed its position as a strong business, networking and knowledge driven platform featuring strong displays of traffic/ transport, road infrastructure and construction and parking solutions. Concurrently held with Road Infratech Expo and Parking Infratech Expo, the show was held from 7 to 9 October 2025 at Hall 3 & 4, Bharat Mandapam (Pragati Maidan), New Delhi.

Simply business, nothing else.

OVER 80 EXHIBITORS FROM

India, Australia, Denmark, Germany, Mexico, Slovakia, Taiwan, UAE, USA

showcased cutting-edge technologies.

- The show served as a key networking hub for government departments, urban planners, public works agencies, and mobility solution providers.
- Live demonstrations of traffic management tools and road construction solutions engaged professionals over three days.
- Focus areas included ITS, tolling, telematics, safety systems, security, parking and smart city technologies.

INTRODUCTION

Inauguration

The 2025 edition emphasised innovation, sustainability and collaboration between government, industry and technology leaders. The three-day expo not only showcased next-gen solutions but also offered a dedicated focus on "Transforming Transportation for the Future." As part of the agenda the show hosted an MoU signing between CDAC and ICAT for indigenous technology development in the automotive sector, alongside expert sessions such as Digital Twin for Mobility Building Transportation Solutions with Local Technologies and a high-level panel discussion on "Strategic support for homegrown technology solutions in the transportation sector."

Organised with the support of key Ministries and Departments/ Associations, including the Ministry of Road Transport and Highways (MoRTH), Ministry of Electronics and Information Technology (MeitY), National Highways Authority of India (NHAI), Central Road Research Institute (CRRI) and National Highway Builders Fund (NHBF), the expo also featured the Smart Mobility Conference, curated in collaboration with ITS India Forum, HOA(I), IHMCL and CUMTA, enabling in-depth policy decisions and cross-sectional collaborations.

Distinguished dignitaries who graced the inauguration ceremony include:

Mr A Satish Ganesh,
IPS: ADGP, Traffic & Road Safety, UP

Mr Ansshuman Singh,
Managing Director, Superwave Communication and Infrasolution Pvt Ltd

Mr AL Narasimhan,
Vice President-Strategic Business Alliances, Prama India Pvt Ltd

Mr Ravi Kumar CK,
Vice President-Business Development (Govt & PSUs), Videonetics Technology Pvt Ltd

Mr Peter Kozej,
Intelligent Transport Solutions Team Lead, SkyToll

Mr JP Nair,
Managing Director, Virtual Info Systems Pvt Ltd

Mr Winston Pereira,
Executive Director, Messe Frankfurt Trade Fairs India Pvt Ltd

Ms Mangala Chandran,
Editor-in-Chief, TrafficInfraTech Magazine & Director-Virtual Info Systems Pvt Ltd

Mr Sagar Nanal
Group Head-Mobility & Technology Shows, Messe Frankfurt Trade Fairs India Pvt Ltd

Coming together of the industry's biggest names on one unified platform

Supporting partners and associations

At Messe Frankfurt India, our commitment to create platforms that don't just showcase technologies but actively drive industry conversations and policy alignment. Traffic Infratech Expo has evolved into an ecosystem where government, industry leaders and innovators converge to shape the future of mobility. This year's edition, with its scale and focus on responsible infrastructure, reflects India's ambition to lead in safe, sustainable and technology-driven transport solutions.

– **Mr Raj Manek,** Executive Director & Board Member, Messe Frankfurt Asia Holdings Ltd

Over the years, Traffic Infratech Expo has become a catalyst for change in India's transport and mobility landscape. Together with Messe Frankfurt India, we have built a platform that drives industry and government collaboration. Technology providers, product manufacturers, government associations, infrastructure, and policymakers are converging at the expo to discuss the real challenges and solutions needed. The 2025 edition is particularly significant as it not only introduces next-gen product categories but also brings multiple agencies and stakeholders to the table, reinforcing the show's role as a driver of innovation and progress.

– **Mr Jayprakash Nair,** Managing Director, Virtual Info System (VIS Group) Pvt Ltd

Press Releases

- Extensive press coverage in mainline and regional media with latest show updates and product launches

Insights from the focused **Smart Mobility Conference.**

The Smart Mobility Conference 2025 served as the knowledge cornerstone of the 13th edition of TrafficInfraTech Expo. The conference convened senior government officials, infrastructure authorities, research institutions, and technology providers to deliberate on indigenous innovation, intelligent transportation systems (ITS), sustainability and policy-aligned infrastructure development. With participation from national and state bodies, the event facilitated meaningful dialogue between the policymakers and the industry on India's evolving mobility ecosystem.

Across three days, the conference addressed critical themes including AI-driven highway operations and maintenance, barrier-free tolling through multi-lane free-flow (MLFF) systems, urban parking policy and enforcement, ITS interoperability, vehicular emission monitoring and public–private partnership (PPP) models for scalable deployments.
Technical sessions curated in collaboration with organizations such as IHMCL, CUMTA, HOA India, and the ITS India Forum enabled in-depth discussions on secure data management, cybersecurity, video analytics, pollution control, and sustainable construction materials. The agenda balanced strategic policy discussions with real-world case studies, demonstrating the application of advanced technologies across highways, urban corridors, toll plazas, and command-and-control centers.

Stakeholder perspectives from the government, industry, and research institutions underscored the need for scalable, cost-effective, and context-specific solutions to address India's unique traffic and mobility challenges. Overall, Smart Mobility Conference 2025 reaffirmed India's commitment to data-driven, secure, and sustainable transportation systems, positioning the event as a critical catalyst for policy, innovation, and market readiness in the infrastructure and mobility sector.

AI-Driven Mobility Takes the Wheel at Traffic InfraTech Expo 2025

By TimesTech - October 9, 2025

The 13th edition of Traffic Infratech Expo, along with Road Infratech Expo and Parking Infratech Expo, have officially opened the doors today at Bharat Mandapam, New Delhi, marking a significant milestone in India's infrastructure and mobility growth story.

Showcasing 300+ brands, the expo serves as Asia's largest integrated platform for traffic management, road construction, parking technologies, security, surveillance and smart mobility solutions. With the theme "Enabling Responsible Infrastructure and Mobility", the 2025 edition emphasises innovation, sustainability and collaboration between government, industry and technology leaders.

The inauguration ceremony was graced by several distinguished dignitaries, including Mr. A. Satish Ganesh, IPS, ADGP, Traffic & Road Safety, Uttar Pradesh; Mr. Ansshuman Singh, Managing Director, Superwave Communication and Infrasolution Pvt. Ltd.; Mr. A. L. Narasimhan, Vice President – Strategic Business Alliances, Prama India Pvt. Ltd.; Mr. Ravi Kumar C. K., Vice President – Business Development (Government & PSUs), Videonetics Technology Pvt. Ltd.; Mr. Peter Kozej, Intelligent Transport Solutions Team Lead, SkyToll; Mr. J. P. Nair, Managing Director, Virtual Info Systems Pvt. Ltd.; Mr. Winston Pereira, Executive Director, Messe Frankfurt Trade Fairs India Pvt. Ltd.; Ms. Mangala Chandran,

NEWSPAPER

GatiShakti bring together 16 ministries, including railways and roadways, for integrated planning and coordinated implementation of infrastructure connectivity projects. With FASTag penetration hitting 97.6 per cent of toll collections, India is already seeing how digital adoption can enhance efficiency and transparency in road operations.

TECH AT THE CORE

Cities are piloting smart parking systems, both in commercial hubs and government-managed facilities. "Mass parking automation is the next big leap," says Shivani Deshmukh, a transportation engineer. "Urban centres are congested not just on roads but in parking lots. AI-enabled systems that guide vehicles to available spots in real time will save fuel, reduce emissions, and improve convenience for commuters."

FUTURE FORECAST

Industry insiders anticipate a significant shift towards automation in urban traffic management over the next five years, with smart signage, centralised command centres, and integrated software systems becoming the norm. "The future of traffic management in Indian cities depends on the cooperation of policy, technology, and private investment," says Anil Pharande, chairman of an infrastructure and real estate firm. "Automation—such as AI-driven signalling, adaptive signals, and AI-based surveillance—will help smooth traffic flow and reduce congestion. But these systems must be funded through models such as public-private partnerships (PPP) and toll monetisation."

With sustained policy support, technological adoption, and robust private partnerships, India's traffic management ecosystem is poised for significant transformation. The challenge lies in ensuring equitable adoption—spanning metros, tier two cities, and rural corridors—while balancing efficiency with sustainability.
