

POST-SHOW REPORT 2024

SHOW PROFILE

Registering success in its 12th edition, TrafficInfraTech Expo, held in New Delhi received 3,249 visitors. Having 86 exhibitors displaying innovative solutions across traffic, transport, road safety, infrastructure, smart and safe mobility, traffic security and many more, covering end to end solutions and requirements, the event had two co-located events, Road InfraTech Expo and Parking InfraTech Expo. A renewed focus on AI and intellegent solutions were observed among the exhibition displays. The interactive conference sessions also discussed about opportunities in projects such as highways infrastructure, smart city development, policy and standardization of traffic rules and traffic management systems and many more.

The expo served as an excellent platform for industry leaders, budding entrepreneurs, startups, and etc., to showcase their innovations before the industry. The expo drew visitors from segments such as government, urban-local bodies, smart cities departments, traffic police departments, city development authorities, road development organizations, consultants, NGOs, fleet operators, contractors, urban planners, trade associations and many more.

Date : 22-24 October, 2024

Venue : Pragati Maidan, New Delhi

Exhibitor Testimonials

Mr DUSHYANT DESHPANDE

Director, Skytoll Pvt Ltd

Skytoll inherits a rich legacy from its European parent company. For the past 15 years, Skytoll has managed GNSS Electronic Toll Collection (ETC) systems for Slovakia, Czech Republic, Slovenia, and is now expanding its services to Croatia. GNSS ETC represents a game-changing innovation that will unfold in the coming years. Having participated in India for the first time, we see immense opportunities to collaborate with stakeholders, including system integrators, tech-service providers, and startups. The engagements we had with visitors and exhibitors at the expo have been very encouraging.

Mr PANKAJ SHARMA

GM – Solution Consulting & Support, D-Link India Limited

As a networking company with a 35-year legacy in India, we specialize in switching, wireless communication, and more. We have also ventured into Machine-to-Machine (M2M) communication, offering products like modems, routers, pod devices, IoT devices, and transit routers. At the expo, we connected with relevant stakeholders and explored ample opportunities facilitated by NHA, one of the supporting authorities. We were pleased to receive significant interest and visits at our stall.

Mr SANDEEP PAWAR

CEO and MD, Kent IT

We have been participating in the TrafficInfraTech Expo for nearly a decade. This platform stands out for its focus on innovation, allowing us to learn about new launches and connect directly with our clients and suppliers. This year, we showcased our patented TL Boosters, introduced in 2023, designed to optimize vehicle queue management at toll plazas by enabling seamless vehicle detection, tailgating prevention, and directional identification. This exhibition remains a vital platform for the ITS industry. With Messe Frankfurt now on board, we foresee even greater growth and reach for the show.

Mr ASHISH AGARWAL

Highway Engineer, AECOM

Safety and speed are often at odds, making advanced technologies like AI and sophisticated cameras indispensable for balancing these priorities effectively. I observed several exhibitors presenting innovative solutions at the expo. As a consultant, I strongly advocate for adopting tolling systems, advanced cameras, ATMS, and other cutting-edge technologies showcased here. With the expansion of highways and smart cities, I am confident that the expo will witness increased participation from both visitors and exhibitors in the future.

Ms NEHA TRIVEDI

Product Head – Entrance Automation Division, Syrotech Networks

At this expo, we are showcasing our range of barriers and cameras, aiming to expand our network and attract new clients—a goal well-supported by the organizers. Additionally, we introduced new barrier and reader systems to our clients and peers present at the expo.

Mr CHIRAG RACHH

CEO, Aditi Tracking Support Pvt Ltd

This show has been very promising, with quality visitors from government sectors and some excellent leads. We introduced two innovative products—video telematics and a fuel solution. The presence of new faces at each edition of the expo is particularly encouraging for us as a brand and motivates us to keep participating.

Visitor Testimonials

Ms MYTHILI MENON

Advisor – ITU and FAO Focus Group

Collaboration is key. Everyone deserves a seat at the table to co-create and build solutions for intelligent transport systems. AI- and IoT-based solutions will drive greater engagement and participation. Standardization is essential for effectively implementing these technologies, and application-based displays can help visitors better understand and connect with the offerings. I look forward to seeing more of this in future editions.

Mr SANJAY SHARMA

Joint Commissioner - Interdepartmental Lead Agency Road Safety Chhattisgarh

This expo is more relevant than ever, considering India's position as a country with a high number of road accidents. The advanced technologies presented here have the potential to significantly reduce accidents. The conference speakers also highlighted innovations that could transform traffic management. There is an urgent need to spread awareness about behavioral change, and AI can play a crucial role in understanding and addressing this.
